SKILLS:

- **Linux/Unix Operating Systems**: Proficient in managing and troubleshooting Linux environments.
- **DevOps Tools**: Proficient with Jenkins, GitLab, and Docker. Familiar with Terraform and Experience with Grafana, Elastic Stack, Docker, Ansible, and Python
- **Version Control**: Skilled in using GitLab for code version control
- **Collaboration**: Proven track record of working effectively in cross-functional teams
- **Spoken Languages**: Native English Speaker

EXPERIENCE:

Linux Systems Support
SGPRODUCTIONOU- Estonia - July 2022- Present

- Managed and maintained Linux servers, focused on performance and reliability.
- Setting up Ubuntu Servers
- Working in agile methodology with DevOps
- Using Jenkins and AWS to help improve infrastructure and scalability.
- Developing Python and Shell scripts for routine maintenance tasks.
- Utilizing Jenkins and GitLab for CI/CD pipeline management and code repository maintenance.
- Setting up virtual machines for clients to help with infrastructure.

Production Show Technician - Linux
Blizzard Entertainment - Los Angeles, California - May 2021 - Nov 2021
Overwatch 2
World of Warcraft
Diablo IV

- Supported software management for Overwatch 2, World of Warcraft, Diablo IV using Linux.
- Enhanced workflows through Jenkins and GitLab; focused on optimizing production pipelines.
- Set up AWS Cloud Rendering for the studio to help produce data faster.
- Used Elastic Stack to help retrieve data.
- Developed scripts using Python and shell scripts to help automate workflows.

Render Wrangler - Linux
Boulder Media - Dublin, Ireland - Nov 2019 - Jan 2021
My Little Pony

- Supported 200+ staff using Linux, developed Python scripts for data
- Developed Python scripts to help support data for producers.
- Managed render workflows and pipelines using Jenkins and GitLab.
- Used Grafana to help monitor the infrastructure by building graphs and utilizing the real time data
- Used Elastic Search to retrieve data for production and stakeholders on render times.

Assistant Technical Director - Linux
Walt Disney Animation Studios - Burbank, California - Jul 2019 - Aug 2019
Miscellaneous Projects

- Created Python tools for production and provided Linux-based support.
- Assisted in maintaining CI/CD pipelines using Jenkins and managed code with GitLab.
- Used Grafana to monitor internal networks and data flow

EDUCATION:
California State Northridge - BA Animation
